## Cisco Systems Awards OnRelay Global '*Application of the Month*'

### *International recognition opens new doors to Cisco channels*

**Surrey, UK, 10 March 2004**, Cisco has named OnRelay's **MBX™** (*Mobile Branch Exchange*) v. 2.2 for Cisco CallManager 3.3(3) as its global ***Application of the Month*** for March.

In addition to this recognition, OnRelay will be participating in Cisco's first ever, global *Application of the Month* 'webinar' to highlight the MBX solution to Cisco channel partners. There will be two 'webinars' scheduled for North America and EMEA. The first will take place on 23 March, and the second on 24 March. Access to these 'webinars' is by Cisco invitation only.

OnRelay received Cisco AVVID certification for its MBX v 2.2 for Cisco CallManager 3.3(3) in December 2003 and was recently one of 20 vendors that participated in Cisco's global channel conference in Hawaii during February 2004.

"We are honoured to be highlighted in this manner and given such extensive visibility by Cisco Systems," States Marie Wold, President and CFO of OnRelay. "Wold adds, "Working with Cisco enables our customers to turn mobile networks into an ally, rather than a threat, to their enterprise networks, and to benefit from the best of two converged worlds – seamlessly bridging fixed - mobile and IP convergence."

OnRelay joined the Cisco AVVID Partner Program as an IP Telephony participant and can be seen on Cisco's AVVID Application Portal, at <http://www.cisco.com/cgi-bin/ecoa/Search>

#### ***About OnRelay, Inc.***

OnRelay is an independent software vendor, pioneering telephony internetworking between fixed and mobile networks. The company's award winning and patented **MBX™** (**Mobile Branch Exchange**) allows corporates to re-privatise mobile telephony in order to control mobile costs, regain control of corporate communications, leverage existing investments in telephony, and offer a future proof solution for migration to new mobile networks technology and software (IP) PBXs.
